

Fáciles

1. SELECT category_name, description FROM categories ORDER BY category_name;
2. SELECT contact_name, address, city FROM customers WHERE Country NOT IN ('Germany','Mexico','Spain')
3. SELECT order_date, shipped_date, customer_id, freight FROM orders WHERE order_date = '2018-02-26';
4. SELECT employee_id, order_id, customer_id, required_date, shipped_date FROM orders WHERE shipped_date > required_date;
5. SELECT order_id FROM orders WHERE mod(order_id,2)=0;
6. SELECT city, company_name, contact_name FROM customers WHERE city LIKE '%L%' ORDER BY contact_name
7. SELECT company_name, contact_name, fax FROM customers WHERE Fax IS NOT NULL;
8. SELECT first_name, last_name, max(hire_date) AS hire_date FROM employees
9. SELECT round(avg(Unit_Price), 2) AS average_price, SUM(units_in_stock) AS total_stock, SUM(discontinued) AS total_discontinued FROM products;

Medium

1. SELECT p.product_name, s.company_name, c.category_name FROM products p JOIN suppliers s ON s.supplier_id = p.Supplier_id JOIN categories c On c.category_id = p.Category_id;
2. SELECT c.category_name, round(avg(p.unit_price),2) AS average_unit_price FROM products p JOIN categories c On c.category_id = p.Category_id GROUP BY c.category_name
3. SELECT City, company_name, contact_name, 'customers' AS relationship FROM customers union select city, company_name, contact_name, 'suppliers' FROM suppliers
4. SELECT year(order_date) AS order_year, month(order_date) AS order_month, count(*) AS no_of_orders FROM orders GROUP BY order_year, order_month

Difícil

1. SELECT e.first_name, e.last_name, COUNT(o.order_id) As num_orders, (CASE WHEN o.shipped_date <= o.required_date THEN 'On Time' WHEN o.shipped_date > o.required_date THEN 'Late' WHEN o.shipped_date is null THEN 'Not Shipped' END) AS shipped FROM orders o JOIN employees e ON e.employee_id = o.employee_id GROUP BY e.first_name, e.last_name, shipped ORDER BY e.last_name, e.first_name, num_orders DESC
